# GNUHealth CON 2019

IV INTERNATIONAL GNU HEALTH CONFERENCE

About GNU Health

GNU Health is, first and foremost, a social project to bring **freedom and equity** in health care around the World. GNU Health involves much more than just technology. It's about Social Medicine and providing the means to **improve the Public Health System with Free Software.**

GNU Health counts with a growing, committed and friendly international community, that brings the best from the social, biological, medical and computer science fields. No matterwhere in the world you live, **we are passionate to keep health - and health informatics - a non -** negotiable human right.

GNU Health is a Free/Libre project for health practitioners, health institutions and governments. It provides the functionality of **Electronic Medical record, Hospital Management, and Health Information System**. Its modular design allows to be deployed in different scenarios: from small private offices, to large distributed networks or even at **national public health systems**.

GNU HEALTH has won among others, the F*ree Software Foundation award for Project of Social Benefit* award or the *OSBAR Business Award*. It has been declared an official GNU package and has been adopted by the **United Nations** University.

GNUHealth CON 2019

IV INTERNATIONAL GNU HEALTH CONFERENCE

GNUHealthCon is an annual conference that brings together enthusiasts and developers of the Free/Libre Health & Hospital Information System.

During the 3-day conference, you'll have the opportunity to attend the different **thematic sessions and free workshops** and share experiences and **implementation cases** and, of course, network with GNU Health community members from around the world!

Day 1 is registration day and IWEEE, the **International Workshop on eHealth in Emerging economies**. **IWEEE** is about **Social Medicine,** a space to give voice to the voiceless, share the experiences from different organizations around the World, and try to find ways to improve the lives of the underprivileged.

Day 2 and 3 are dedicated **exclusively to GNU Health.** In the thematic talks, we will discuss topics such as the upcoming features, standards, security, mobile applications, and implementation cases.

At GNU Solidario, we will be honored to have you among us. We are counting on your active participation to get the most out of the conference. Most importantly, we want you to have fun, feel at home, and enjoy being part of the GNU Health community!

IWEEE

Social Medicine

The International Workshop on e-Health in Emerging Economies (IWEEE) is an annual conference for **Free / Libre Software in Healthcare** and **Social Medicine** advocates. The workshop promotes Free Software as an effective and ethical solution to provide universality and equity in health care.

IWEEE will take place on the first day of the GNUHealthCon conference.

IWEEE brings together a multi-disciplinary team from NGOs, Academia, Government and companies to try to find ways to improve the lives of millions of human beings around the world. IWEEE focuses on the human factor, and how technology can make a difference in the **socio-economic determinants of health.**

Throughout these years, IWEEE has become a place to share experiences, ideas and debate on technology and politics. It has been the incubator of many projects that are a reality today around the World.

Freedom and Equity in Healthcare

Why Sponsor?

GNU Solidario is a non-profit, Non-Governmental Organization with focus on delivering Health and Education with Free Software. Since 2006 we have been involved in humanitarian projects in countries around the globe. GNU Health is part of the GNU Solidario project.

GNUHealthCon is run and organized by volunteers. Your participation as a sponsor makes the event possible, and contributes to the evolution of GNU Health and, as a result, to the universality of Public Health and Health Informatics.

We truly hope you can support our project by sponsoring GNU Health Con, and we are looking forward to meeting you at the event!
